RE: Street View Photo Update

To Whom it May Concern:

Wayne County/City of Richmond GIS Interlocal, Emergency Management 911, and Wayne County Assessor's office are funding the update of the current collection of street view photos for each addressed location within the county. These photos are used for 911 emergency response and various other local government offices within the City of Richmond and Wayne County.

Midwest GIS is the company hired to collect these photos over the next 3 months. Their employees are driving marked vehicles with the company name and 911 on the side of the vehicle.

If you have any questions, you're welcome to call the 911 non emergency number 765-973-9355 to get additional information.

Sincerely,

Fred Griffin
Director
